

# EZY Lift Light Duty

# EZYLift-Light Duty

EZYLift is a lowerable pole that provides fast and safe installation for light duty applications. The pole utilises a cleverly designed lowerable base plate design with a removable hinge pin, it is easily raised by walking it up to a vertical position then fixing the 2 plates together with unique security bolts.

The need for any lifting equipment is eliminated and all work is carried out at ground level. The EZYLift pole is available in 3 pole designs, the standard straight pole, a tapered pole or a boulevard pole design.

## Key Benefits

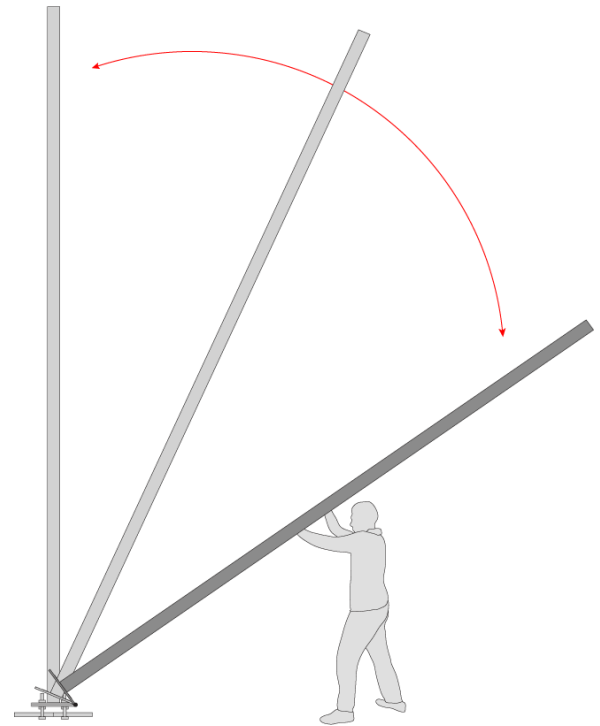

- Suitable for all industrial and public access areas.
- Tilting of pole can usually be carried out by a single operator.
- Stable structure for light duty applications such as CCTV camera and LED light fittings.
- Hinged base plate design does not require any other equipment to assist lowering or raising the pole.
- Constructed in high tensile steel and hot dip galvanised after fabrication for durability.
- Secure base cover prevents any unauthorised lowering of the pole.

Personal Required for Installation

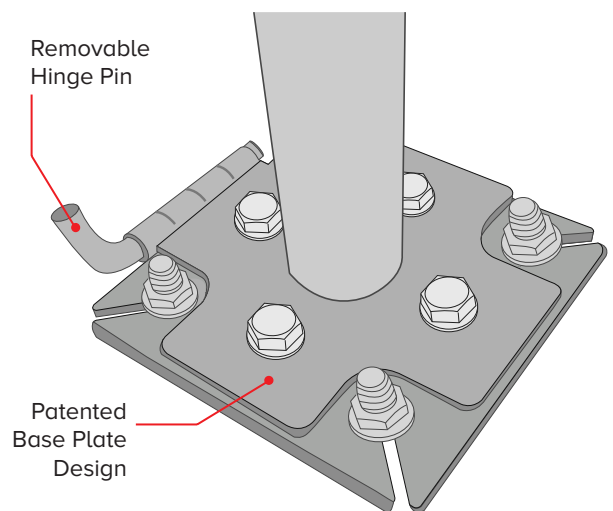

Installation Time

**15-45**  
minutes

POLE LOWERING PROGRESSION

EZY LIFT POLE

Product Code	Max Height (Meters)	Pole Top (Diameter)	Max Load	Base Plate	Finish
EL-ST-x.xM	6.5	76mm	12kg*	250mm PCD	Hot-Dip Galvanised
(X Signifies Pole Height, Available from 3.0 Meters)					
*Maximum Load to be confirmed with engineering report from EZYPole.
